About the Investment

Investment objective(s)

The Investment is a five-year, ZAR, 100% capital-protected investment linked to an Index that tracks the performance of a global multi-asset portfolio. The Investment is linked to the BNP Paribas Multi-Asset Global Diversified Index (the 'Index').

After five years, you will receive back:

- Your investment amount will always be 100% protected at maturity.
- After five years, if the Index return is positive, investors will receive their full Investment Amount back plus minimum predetermined participation (see investment schedule) in any Index growth. If the Index return is negative, the investor receives only full of the initial Investment Amount back.
- The index returns are further enhanced by USD/ZAR exchange rate at maturity.

Currency risk

The index is quoted in USD. Your investment is in ZAR and any positive index performance is exposed to the ZAR/USD exchange rate over the investment term. This investment does not utilise any of your individual foreign exchange allowances.

Capital Protection

After five years, if the Index return is positive, investors will receive their full Investment Amount back plus at least 670% participation in any Index growth. If the Index return is negative, investors will receive 100% of their invested capital back.

Participation Rate (PR)

The Participation Rate will be determined on the Investment Start Date and will be at least the percentage quoted above. If it is below the Investment will not go ahead and you will receive your Investment Amount plus interest back.

The Index

The Index to which the Investment is linked to the BNP Paribas Multi-Asset Global Diversified Index (BNPIMCD5 Index) (the 'Index'). The Index fact sheet can be found on our website or ask your financial adviser to provide you with a copy.

Index Performance Calculation

Initial Index Level (i)

The level of the Index on the Investment Start Date at the valuation time as determined by the calculating agent, that is, BNP Paribas.

Final Index Level (f)

The arithmetic average of seven monthly levels of the Index will be taken over the last seven months of the Investment term, at Valuation Times as determined by the Calculation Agent. These dates will be available on the term sheet posttrade and will be made available to investors upon request.

Index Performance (IP)

$$IP = (f-i)/i$$

Valuation Time

The time at which the official closing level of an index is calculated and published.

Final Redemption Amount

Final Redemption Amount calculation:

$$FRA = \text{Investment Amount} \times (100\% + PR \times \text{MAX}[0\%;IP]) \times FX$$

PR=Participation Rate

IP=Index Performance

FX= USD/ZAR Exchange Rate
